Projects

Car Store Website (Frontend, Single Web Page Project) Using HTML, CSS AND JavaScript
The aim of this project is to define the purpose and focus of my website design. It articulates the overarching goals and objectives a car business wants to achieve with its online presence. This clarity ensures that my website content, design, and functionality are aligned with the business's vision. A well-designed website balances aesthetics, usability and functionality to meet user expectations.

Travel Website (Frontend, Multiple Web Page Project) Using HTML, CSS AND JavaScript
Developed a well designed traveling website project using HTML, CSS and JavaScript fundamentals. The goal is to create a seamless, efficient, accessible, and aesthetically pleasing user interface that helps users feel good about the content they're reading or the actions they're taking on a site

Achievements

Academic
UDEMY certification on JAVA.

Hobbies

Gaming, Listening Music and Drawing
